Suggested Paragraphs

1- Ecosystem

An ecosystem is all the animals and plants in an area. The ecosystem can be as small as a pond or as big as a forest. In an ecosystem, living things such as plants and animals interact with non-living things such as water, rocks, and soil. The different species in an ecosystem make a community, and they all need each other to survive.

2- A healthy heart

Your heart beats over 100,000 times a day! So it's important to keep your heart healthy. When you walk, run, swim, or cycle you make your heart work harder. If you exercise regularly, your heart works better and you can get the minerals, nutrients, and oxygen you need more easily.

3- How to stay healthy

Health is very important. I love sports. I play tennis, football, and basketball. I eat healthy food like fruit, vegetables, and rice. I don't eat a lot of chocolate because I know it isn't very healthy. In the evening, I want to relax, so I read a book.

Suggested Paragraphs:

1- Wonder of Africa

The African continent is an amazing place, with mountains, deserts, lakes, valleys, and rainforests. There are beautiful coasts, waterfalls, and volcanoes. It has some of the most famous natural wonders in the world, like Ngorongoro Crater, Victoria Falls, Mount Kilimanjaro, and the Sahara Desert. There are man-made wonders too, like the Pyramids of Giza.

2- Rainbow Bridge in the USA

Rainbow Bridge is one of the largest natural arches in the world. It is also 200 million years old. It is on Lake Powell in Utah, USA. It is 88 meters tall and it is made of red and brown sandstone. A river eroded a hole in the sandstone and has formed the arch over many, many years. Rainbow Bridge has been a National Monument since 1910. If you want to visit it, you have to take a boat, ride a horse, or walk to it. It is in a very hot desert. So you should visit it in the spring or in the fall. Don't forget to take your water bottle and a sun hat.

3- The Sahara Desert

The Sahara Desert is the largest hot desert in the world. It covers eleven countries. Some of the sand dunes can be 180 meters high. Although it is a hot and dry place, some animals and plants live there.

Suggested Paragraphs:

1- Natural resources:

Natural resources are things we can use from nature, like wood, and soil. We use them to make the things we need. We use wood to make tables, stone to build houses, and plants for food. The sun is a natural resource because it gives us solar energy to make electricity. Some natural resources are renewable, but some natural resources are non-renewable such as coal and gas.

2- Resources in Ancient Egypt:

Ancient Egypt was very successful because it had good natural resources. Agriculture was a very important part of the economy of ancient Egypt. The Nile flooded every year and made the soil fertile. Farmers grew lots of different crops, such as cotton and rice. They used flax to make linen for clothes. Stones and rocks were useful natural resources in ancient Egypt. They could build the Pyramids and temples.

3- Honey:

Egyptians used this to make medicine. It was very important for helping with problems with the skin or eyes. There are hieroglyphics in ancient temples which show people keeping bees. Honey was an expensive but important natural resource. People used it to make food taste sweet. They put bees in houses called hives.

4- Wadi El Rayan waterfalls:

Last week our class went on a trip to waterfalls at Wadi El Rayan. It was beautiful! There are two lakes there. The sound of water falling is very loud. We learned that water comes from an oasis in the desert. It is a place in the desert with water. We saw some of the birds and my favorite was the flamingo. We had fun and it was a fantastic day.

Listening texts:
Exam 1 on unit 1:

1) Listen and circle the correct answer:

Nabq is a very big National Park in South Sinai. Along the coast here, there are 4.8 kilometers of mangrove forest, which is the largest in the Red Sea. We went there to learn why mangrove forests are so important for the marine ecosystem. When we arrived at the beach, we saw trees growing out of the sea! Most trees can't grow in salt water, but mangrove trees can.

2) Listen and answer:

An ecosystem is all the animals and plants in an area. The ecosystem can be as small as a pond or as big as a forest. In an ecosystem, living things such as plants and animals interact with non- living things such as water, rocks, and soil. The different species in an ecosystem make a community, and they all need each other to survive.

Exam 2 on unit 1:

1) Listen and circle the correct answer:

Your heart beats more over 100,000 times a day! So it's important to keep your heart healthy. When you walk, run, swim, or cycle, you make your heart work harder. If you exercise regularly, your heart works better and you can get the minerals, nutrients, and oxygen you need more easily.

2) Listen and answer:

Malak wanted to learn more about the Amazon rainforest, because a lot of people are cutting down the trees. The Amazon rainforest is a very important ecosystem. All the living things in the rainforest need each other. Custard apple trees help many animals survive. The animals take the trees seeds to other parts of the forest.

Test

An ecosystem is all the animals and plants in an area. The ecosystem can be as small as a pond or as big as a forest. In an ecosystem, living things such as plants and animals interact with non-living things such as water, rocks, and soil. The different species in an ecosystem make a community, and they all need each other to survive.

Question 1

Test

An ecosystem is all the animals and plants in an area. The ecosystem can be as small as a pond or as big as a forest. In an ecosystem, living things such as plants and animals interact with non-living things such as water, rocks, and soil. The different species in an ecosystem make a community, and they all need each other to survive.

Question 1

Test

Egyptians used honey to make medicine. It was very important for helping with problems with the skin or eyes. There are hieroglyphics in ancient temples which show people keeping bees. People used papyrus to make things such as baskets and sandals, but the most important thing they made from it was paper. The ancient Egyptians made some of the first books in the world using this plant.

Question 1

Test

I'm Amal. I want to be an astronaut because I'm interested in the stars and the planets. It is important to study other planets because it helps us understand our own planet, and this might help us solve some of Earth's problems. When you see videos of the International Space Station, it looks fun living without gravity - the people float all the time! I've read a lot about the planet Mars and the research scientists are doing. Maybe I can visit Mars one day!

Important Topics

Unit 1

Nabq National Park

Nabq is a very big national park in South Sinai. Along the coast, there is a mangrove forest. Mangrove forests are so important for the marine ecosystem. Trees grow out of the sea there. They have amazing roots. The roots grow high out of the water. Mangrove trees protect the non-living things and the living things in the marine ecosystem. They helps us with global warming.

Amazon rainforest

The Amazon rainforest is a very important ecosystem. All the living things in the rainforest need each other. Birds and animals help the trees as they take seeds from place to place in the forest to grow new trees. Animals eat custard apple fruit to survive. So it's very important. It's important to protect our forests to help the environment.

Mangrove trees

Mangrove trees are very important for a lot of animals and birds. They're a safe home for hundreds of animals, birds and insects. There are many marine animals live among their roots. The trees' roots grow high out of the water. These roots help them get oxygen. Birds and animals eat their fruit to survive. Bees help to carry the pollen among the flowers to grow new plants. Mangrove trees are important for the environment.

Circulatory system

Our circulatory system has veins, arteries and our heart. Arteries move blood away from our heart. Veins carry blood to the heart. The blood carries the nutrients and oxygen that we need in our body. Our heart pumps blood all the time. It beats about 70 times a minute. It's important to keep our heart healthy. Keep moving, walking, running and riding bikes to help your heart.

How to be healthy

From : seif@gmail.com

To : ahmed@gmail.com

Subject : how to be healthy

Dear Ahmed,

How are you ? It's important to be healthy. You should eat healthy food like fruit and vegetables. Don't eat a lot of chocolate. It's not healthy. Doing sports is important to keep healthy. Do exercise because it's good for your heart. Relax and have good sleep at night. Try to listen to music to relax. It's important for our hearts to have healthy style life.

Yours,

Seif

Mangrove forests

Mangrove forests are very important for the marine ecosystem. Mangrove trees grow in salt water. They grow high out of the water. The roots of mangrove trees help them get oxygen. Mangrove thick leaves stop the plants losing water when it is very hot. Mangrove trees help with global warming. The forests are

a safe home for many animals. So the mangrove trees help the environment in many ways.

An ecosystem

An ecosystem is all animals and plants in an area. It can be as small as a pond or as big as a forest. In an ecosystem, living things interact with non-living things. In an ecosystem, the different species need each other to survive. The different species make a community.

Unit 2

The Sahara Desert

The Sahara Desert is the largest hot desert in the world. It covers eleven countries. It's about nine millions square kilometers. Some of the sand dunes are very high. They can be about 180 meters high. The Sahara Desert is a very dry place. Some plants and animals live in Sahara Desert. People also have lived there for thousands of years, too.

Man-made wonders of Africa

People have made many incredible things in Africa. Some of the most important man-made wonders are in Egypt. The Pyramids of Giza, the Sphinx and the temples of Abu Simbel are man-made wonders in Egypt. People come from all over the world to learn about Egypt's history. Archaeologists think that Sahara in Africa wasn't dry because of the paintings show animals that live in water.

Storm-chasers

Storm-chasers are people who travel to places where a hurricane is forecast. Storm-chasers are interested in forms of extreme weather. They get close to the extreme weather event to study it. They have cameras to photograph these events. Floods, thunderstorms, and dust storms are examples of the extreme weather. Storm-chasers travel to many countries to be close to the extreme events. It's amazing!

The volcanoes of Java

The volcanoes of Java is on the pretty island of Java. Everything there is made of lava! There are more than thirty-nine volcanoes. When they erupt, there's ash and fire. Smoke fills the air. The lava and ash mix with mud flows. This makes soil good for growing food. Farmers can grow many kinds of crops there.

Rainbow Bridge

Rainbow Bridge is one of the largest natural arches in the world. It is 200 million years old. It's on Lake Powell in Utah, USA. It's made of red and brown sandstone. A river eroded a hole in the sandstone and has formed the arch. If you want to visit it, you have to take a boat, ride a horse or walk. It's interesting.

A balloon ride

I have got tickets for the Luxor hot air balloon festival. I'll go with my family. We'll see balloons in lots of colors. I'm very excited. I think about the festival. There's a hot air balloon pilot. It's a perfect weather today with no rain and a gentle wind. Soon, we're flying

over the city of Luxor. We see green fields and sandy deserts. There are palm trees, dunes and mountains. It's very amazing!

The Pinnacles

The Pinnacles are one of the most unusual geological formations in western Australia. They are a group of tall white rocks in the Nambung National Park. The Pinnacles are made of white limestone which the rain and wind had eroded into different shapes. The tallest columns are between three and five meters high. The best time to visit them is in the early morning or late afternoon.

The Ngorongoro Crater

The Ngorongoro Crater is in Tanzania. It's the largest volcanic crater in the world. It was formed when a volcano erupted millions of years ago. There are wetlands and forests inside the crater. You can see lots of different animals, birds and plants there.

Unit 3

Natural resources

Natural resources are raw materials. We can get natural resources from nature. Some natural resources like solar energy are renewable. We can get solar energy from the sun to make electricity. We also use natural resources to make things. We use wood to make tables. We use stone to build houses. Some natural resources are non-renewable like coal.

Gold in ancient Egypt

Ancient Egypt was very successful because it had good natural resources. Salt, flax and gold were very important natural resources in ancient Egypt. Pictures of life in ancient Egypt often show jewelry and beautiful objects made from gold. People in ancient Egypt found gold in rivers, then they made mines to get more out of the ground.

Honey

Honey is very important for us. It was an important natural resource in ancient Egypt. People can use honey for many different things. Honey is a liquid. It's sticky, soft and smooth. We use honey to make food taste sweet.

A science experiment

From : tarek@yahoo.com

To : youssif@yahoo.com

Subject : a science experiment

Dear Youssif,

How are you ? I'd like to tell you about a science experiment. Yesterday, we did an experiment about different liquids in the science class. We had small jars with different liquids like honey, milk, water and maple syrup. We also had some tall glass jars and a plastic syringe. We poured the honey slowly in the glass jar, then we slowly poured the maple syrup. The syrup made a layer on top of the honey.

Yours,

Tarek

Wadi El Rayan Waterfalls

Last Friday, we went on a trip to the waterfalls at Wadi El Rayan. It was beautiful. There are two lakes there. There are a lot of birds living there. We learned that the water comes from an oasis in the desert. The sound of water falling is very loud.

Resources in ancient Egypt

Flax, salt, gold and copper were very important resources in ancient Egypt. People in ancient Egypt used flax to make linen for clothes, as well as strong ropes. Salt was also a very important resource. It was useful in medicine and agriculture. Copper was another important resource. People used it to make tools, cooking pots and knives.

A trip to Wadi El Rayan Waterfalls

I went on a trip to the waterfalls at Wadi EL Rayan last summer. I went there with my friends by bus. We took many wonderful photos. I had lunch there with my friends. We learned a lot about Wadi El Rayan Waterfalls. There are two lakes there; one at the top of the waterfalls and one at the bottom. There are a lot of different birds living there.

Unit 4

Riding a bike

Riding a bike is very interesting. We use force to get the bike to move by pushing the pedals. We also use force to stop the bike, by using the brakes. The brakes can slow down or stop the wheels. If you want to increase your speed, push the pedals more quickly.

How to make a dart

From : mona@yahoo.com

To : sally@yahoo.com

Subject : how to make a dart

Dear Sally,

How are you ? I want to tell you about how to make a dart. Take a piece of paper and fold it in half vertically. Crease it. Open the paper. Fold over the top two corners. Turn the paper over. Fold it in half and crease it. Fold down the wings and crease them. Then fold them down again and crease them. Your dart is ready to fly.

Yours,

Mona

Flying and gravity

Gravity is the pull force. It brings objects towards the Earth. Gravity keeps people from flying up into space. On Earth, gravity pushes our bones together. There is no gravity in space. Gravity usually pulls things to the ground.

Jobs in science

Astronauts, pilots and engineers are very important. The astronaut is always interested in stars and planets. It's very important to study other planets because this might help us solve some of Earth's problems. Being an engineer is really interesting. You need to understand science to do this job. Being a pilot is not an easy job, but it's amazing. Sometimes, the planes do amazing moves. The air resistance helps the planes to stay in the air.

A job you want to do

From : sayed@gmail.com

To : younis@gmail.com

Subject : a job I want to do

Dear Younis,

How are you ? I want to tell you about a job I want to do in the future. I'm really interested in space and I want to understand it better so I want to be a scientist. I need to study chemistry, math and physics in university to be a scientist. I like math but I think chemistry and physics are difficult.

See you soon !

Sayed

The first man to fly

Abbas Ibn Firnas was probably the first person to fly using wings so he became very famous. He was an important person. He invented many things. He invented water clocks.

A job you would like to do in the future

We must think about the future and get ready for it so I think about my future job. In the future, I would like to be a doctor. I'm interested in science. To be a doctor, I need to study medicine, chemistry and physics in university. I want to be a doctor to help people who are ill. Doctors work in many places like hospitals.

Your father's job

My father is an engineer. His job is really interesting. My father helps to build roads and bridges. He also helps make things such as skateboards. My father says that you need to understand science well, to be a good engineer.

Paragraphs

How to stay healthy

Health is the biggest wealth. It's important to stay healthy. You need to follow some rules to keep healthy. You should eat some fruit and vegetables every day. You shouldn't stay up late. You should sleep 8 hours. Doing sport is good for the body. You should do exercise to be fit. If you exercise regularly, your heart works better. You should walk or run for 10 minutes a day. You shouldn't eat fast food. You should drink lots of water to stay hydrated and get lots of minerals.

Mangrove Trees

Mangrove trees are so important to the environment. They are also important to the marine ecosystem. They protect the living and non-living things in the marine ecosystem. Their roots grow high out of water. Their roots help them get oxygen. Their leaves are very thick. These leaves take four times carbon dioxide more than other kinds of trees. They help us with global warming. Their leaves stop the plants from losing water when it is hot.

A healthy heart

It's important to keep your heart healthy. Your heart beats over 100.000 times a day. When you walk, run, swim or cycle, you make your heart work harder. If you exercise regularly, your heart works better and you can get the minerals, nutrients and oxygen you need more easily. A strong heart can pump blood to all parts of the body well.

A healthy family

I’m a healthy boy. I love sports. I play tennis, football, and basketball. I eat healthy food like fruit and vegetables. I don’t eat a lot of chocolate because it isn’t very healthy. In the evening, I want to relax, so I read a book. My family is healthy, too. My sisters Nour and Habiba do karate. My mom usually walks to work and my dad rides his bike, but they don’t play sports. It is very important to keep healthy.

Rainbow Bridge

Rainbow Bridge is one of the largest natural arches in the world. It is also 200 million years old. It is on Lake Powell in Utah, USA. A river eroded a hole in the sandstone and formed the arch over many years. It is 88 meters tall and it is made of red and brown sandstone. Rainbow Bridge has been a National Monument

since 1910. If you want to visit it, you have to take a boat, ride a horse, or walk to it. It is a very hot desert. So, you should visit it in the spring or in the fall. Don't forget to take your water bottle and sun hat.

Wadi El Rayan waterfalls

We went on a trip to see waterfalls at Wadi El Rayan. There were two lakes, one at the top and one at the bottom. The waterfalls were very loud. The water came from an oasis, and it traveled a long way through a tunnel to get to the lake. We saw many birds, my favorite was the flamingo. We went swimming in the safe bottom lake to cool down.

To : Asser
Subject: My job in the future
Hi Asser,
How are you? You asked me what job I want to do in the future and I've decided now. I want to be a scientist and study space. I'm really interested in space. I want to understand it better. I need many things to do this job. First, I need to do well at school, especially in science. Then, I need to go to the university and study subjects like chemistry, math and physics. Finally, I need to find a job at a place where people study space, like a university. Then I can work on projects and learn from other scientists. What do you think? Do you know what job you want to do in the future?
Bye for now!
Maged

Best of luck
